DETAILED ACTION

102 Rejections Withdrawn

The rejection of claims 9-11 under 35 USC 102(b), in so far as they read on the species defined in the previous Office Action, has been overcome by applicant's amendment. The amendment narrows the variable definitions such that the instant set of compounds no longer reads on the cited prior art.

The search was therefore expanded as called for under current Office Markush practice. This resulted in all remaining species being searched and deemed free of the prior art.

Allowable Subject Matter

Claims 9-12 are allowed. The following is an examiner's statement of reasons for allowance:

The closest prior art remains the prior art of record. This art neither teaches nor suggests the instant compounds. Applicant has narrowed the variable definitions (in particular, that R⁴ cannot be H) such that the instant set of compounds no longer reads on the cited prior art. Nor would it have been obvious to one of ordinary skill in the art at the time of invention to modify the compounds of the prior art in order to arrive at those of the instant invention. There is no motivation to do so.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably

Art Unit: 1621

accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure: US 3,270,036 is cited to show related compounds.
